SL380

Modern production lines demand high speeds, zero faults, safe working environments and flexible, multi production lines. These determine today's labelling equipment specifications. On-going research has identified a specific need now filled by the SL380 labelling head.

A compact design in stainless steel materials available in right and left hand versions either of which will fit easily into your production lines. This machine offers high levels of accuracy, flexibility and dispensing speed up to 1,000 labels per minute, depending on the label length.

The SL380 is driven entirely by an integral electronic circuit giving optimum labelling tolerances and high speeds together with acceleration capabilities to allow very small labels to be applied.

Ideal to use for all multi product lines is the SL380, it can memorise up to 16 different product/label-combinations enabling the operator to adjust settings immediately. In addition, the SL380 can compensate for any missing label ensuring faultless applications for any product. The automatic speed follower is standard on the SL380.

Technical Specifications SL380 :-

Label width (incl. Backing paper)	160mm
Label length	min. 10mm – max. 500mm (depending on speed and required performance)
Label unwind outside diameter	max. 400mm
Label core diameter	76.2mm
Label stop accuracy	±0.5mm
Dispensing speed	0.5 - 80m/min. With APSF 0.5 - 100m/min. (SL380HS)
APSF*	APSF sensor not included
Missing label function	Automatic compensation
Mechanical executions	right or left hand
Drive system	stepper and AC motor
Dimensions (w x h x d)	735mm x 795mm x 400mm
Weight	70kg
Power supply	110/220/240V ±10% (fuse size for all voltage levels 4A)
Protection class	IP41
Tandem mode	Yes
Accessories	Serial interface, sensor for transparent labels, material end detection (OD control), device status interface
